

**W O K E**

**Wide Open Knowledge and EMPATHY**

The abundance of information accessible through the internet can be overwhelming. Concerning trends like fake news and sneakily sponsored content creates a need to identify the credibility of sources.

People get news from the internet (primarily social media), making it difficult to read information outside the political comfort zone within their newsfeed. This lack of visibility (and therefore understanding) of opposing views polarises society.

**How can people develop an informed opinion and be more empathetic to others with opposing views?**

# Research

User Interviews | Affinity Mapping | Personas | Competitor Analysis

# User Interviews

Interviewed 8 people  
between ages of 24-34

All of them use the internet as  
their primary news source

All of them try making an effort  
to stay informed on current  
events

# Affinity Mapping

## Mental Exhaustion

“I consider media bias but I do not know what to make of them sometimes”

“Sometimes I just want to turn off”

“On the weekends I just want to tune-out”

**Trying to stay informed can be taxing on the brain**

## Time Constraints

“Well TBH I am not able to do my due diligence and research every little news story out there”

“Often times its hard and time constraining to read multiple articles so I just read one article”

**Most people would like to stay informed but just don't have the time**

## Avoiding Contrarian Viewpoints

“I don't go and seek viewpoints that I do not agree with”

“I only read sources I can trust”

**People like staying in their catered newsfeed because it is convenient and comfortable**

# Persona

## Context:

Mark works for a marketing company in East London, he enjoys playing video games and rock-climbing on his free time. He understands the importance of staying informed but sometimes just feels too lazy and overwhelmed.

## Meet Mark

**Age:** 25

**Location:** London

**Occupation:** Account Executive

## Behaviours:

Gets the majority of news and information on topics of interest over the internet, predominately on his phone through news alerts and his social media feed.

## Frustrations:

Not being able to easily identify; bias, fake news, and sponsored content when scrolling through his newsfeed.

## Goal:

Use the internet and his mobile as the primary means to inform his opinion and get a balanced view in a minimal amount of time.

## Challenge:

On his newsfeed he needs to easily identify sponsored content, fake news, and credibility of sources - while being exposed to various viewpoints.

# Competitor Analysis

	PROS	CONS
<b>Fact Checkers</b> 	<p>Does the due diligence for you to fact check articles</p> <p>Assesses whether statements are truth or lies, and measures the credibility</p>	<p>You have to be motivated to go on the website to check.</p> <p>They are region or topic specific.</p>
<b>Content-Blockers</b> 	<p>Blocks specific content like advertisements, and fake news</p>	<p>Does not work in mobile or native apps.</p> <p>Sponsored content and low credibility news can slip through the cracks.</p>
<b>Media Bias Fact Check</b> 	<p>Has the largest database of media biases.</p> <p>Fact checks articles</p> <p>Introducing a fake-news and content filtering/blocker</p>	<p>The mobile app just links you to the website</p> <p>The web-extension only works on Facebook and not very user friendly</p>

**Why build something bespoke  
and brand new when you can  
reuse pre-existing data, tools  
and platforms?**

**Instead, build a plug-in that  
utilises existing data and tools  
to improve the newsfeed  
experience across various  
platforms**

cross-platform  
plug-in that  
improves the UX  
of writing

cross-platform  
plug-in that  
improves the UX  
of writing

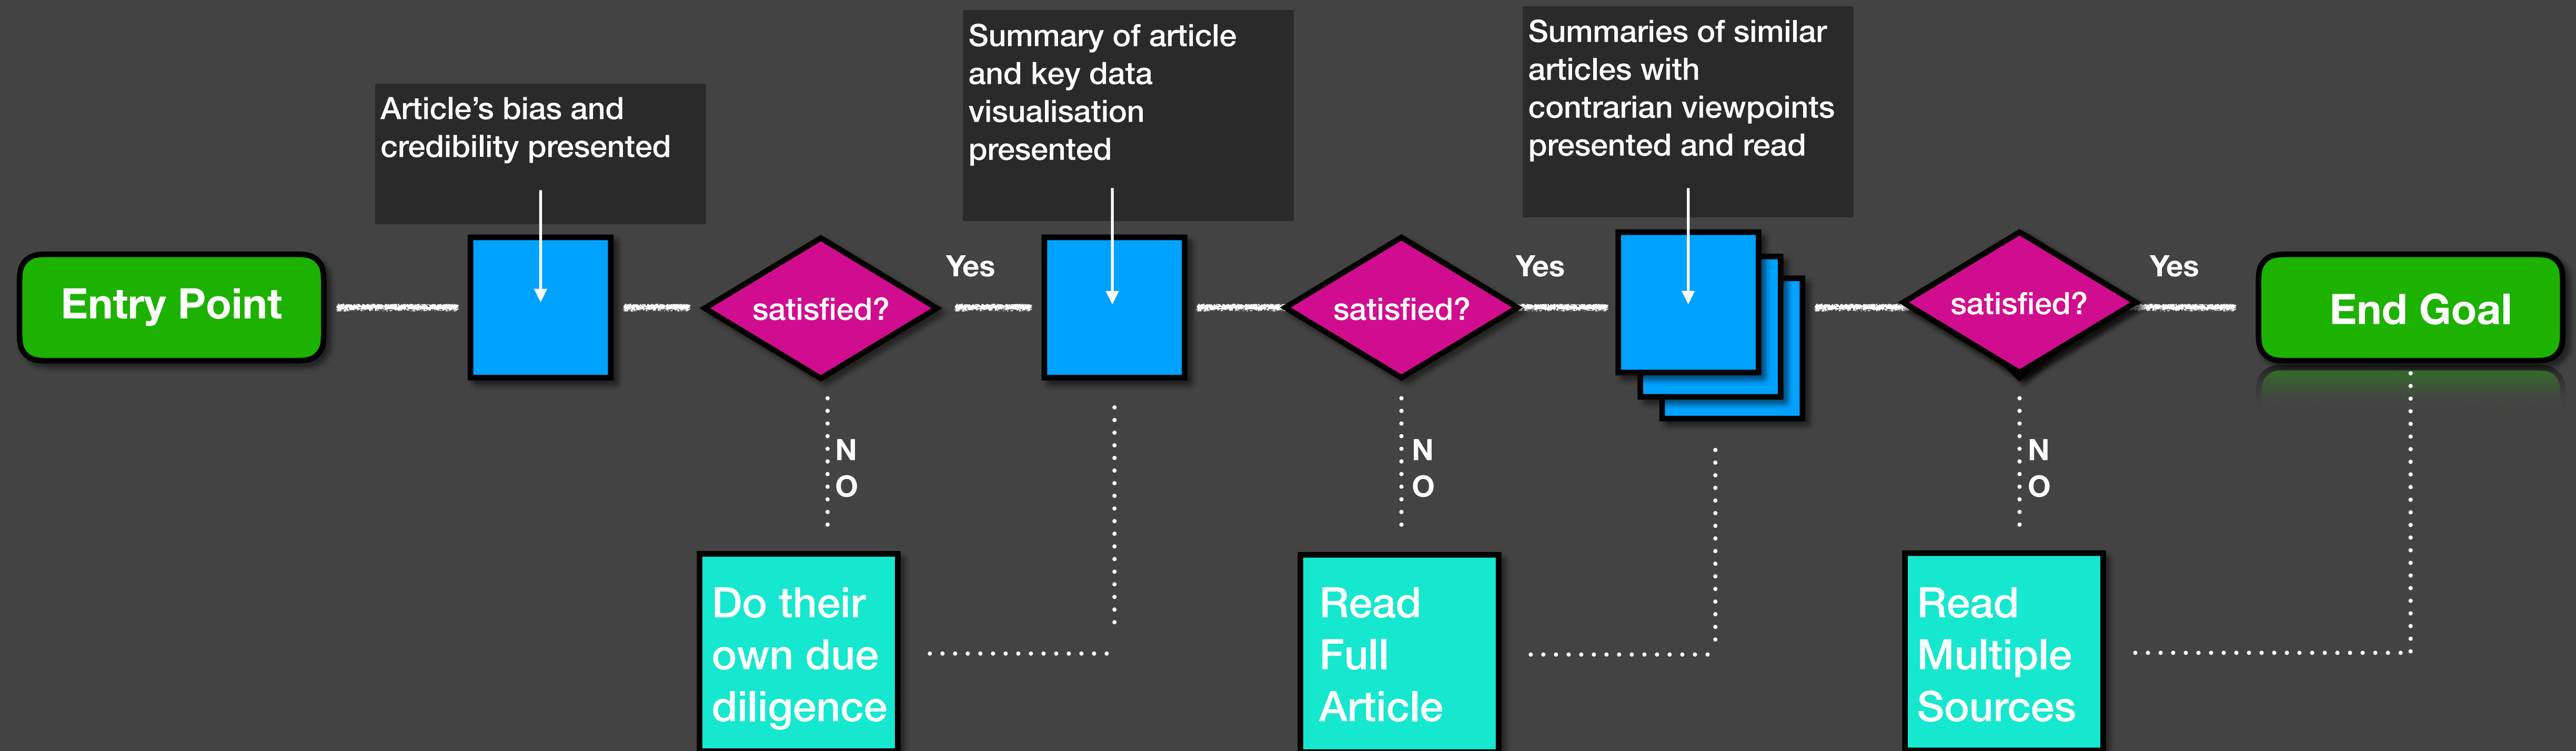

cross-platform  
plug-in that  
improves the UX  
of newsfeeds

# (idealistic) User Flow

## Entry Point:

when the user encounters an article on their newsfeed with the W@KE plug-in activated

## End Goal:

User develops an informed opinion and empathy to opposing views

How do you rapidly  
prototype a plug-in?

The background of the image is a close-up of a wooden surface, likely a table or floor, showing horizontal planks with a prominent grain and several knots. The wood has a warm, brownish-gold tone. Overlaid on this background is a dark, semi-transparent rectangular box. Inside this box, the text "By mapping the onboarding journey" is written in a clean, white, sans-serif font. The text is centered and occupies most of the width of the box.

**By mapping the  
onboarding journey**
